Financial Analysts Webcast

Sep. 2017

Forward-Looking Statements

This presentation and our remarks contain forward-looking statements (within the meaning of The Private Securities Litigation Reform Act of 1995) that involve substantial risks and uncertainties, including statements regarding our expectations and beliefs about our business, strategy, and future operating performance. These forward-looking statements are only predictions and may differ materially from actual results due to a variety of factors, including, but not limited to: changes in the overall economy; changes in competition in markets in which we operate; our ability to derive revenues in the future from our current research and development efforts; changes in the demand for our offerings and services; the loss of a significant customer; consolidation within the industries in which our customers operate; changes in the telecommunications regulatory environment; changes in technology that impact both the markets we serve and the types of offerings and services we provide; financial difficulties of our customers; losses of key personnel; difficulties in completing or integrating acquisitions; litigation and regulatory proceedings; and acts of war or terrorism. Please refer to our filings with the Securities and Exchange Commission, including our Annual Report on Form 20-F filed on December 12, 2016, and our Form 6-K furnished for the first quarter of fiscal 2017 on February 13, 2017, the second quarter of fiscal 2017 on May 22, 2017 and for the third quarter of fiscal 2017 on August 14, 2017 for a discussion of these and other important factors.

You can identify forward-looking statements by words such as “expect,” “anticipate,” “believe,” “seek,” “estimate,” “project,” “forecast,” “continue,” “potential,” “should,” “would,” “could,” “intend,” and “may,” and other words that convey uncertainty of future events or outcome. Statements that we make in this presentation that are not statements of historical fact also may be forward-looking statements. Forward-looking statements are not guarantees of future performance, and involve risks, uncertainties, and assumptions that may cause our actual results to differ materially from the expectations that we describe in our forward-looking statements. There may be events in the future that we are not accurately able to predict, or over which we have no control. You should not place undue reliance on forward-looking statements. Although we may elect to update forward-looking statements in the future, we disclaim any obligation to update do so, even if our assumptions and projections change, except where applicable law may otherwise require us to do so. These forward-looking statements should not be relied upon as representing our views as of any date subsequent to the date of this presentation.

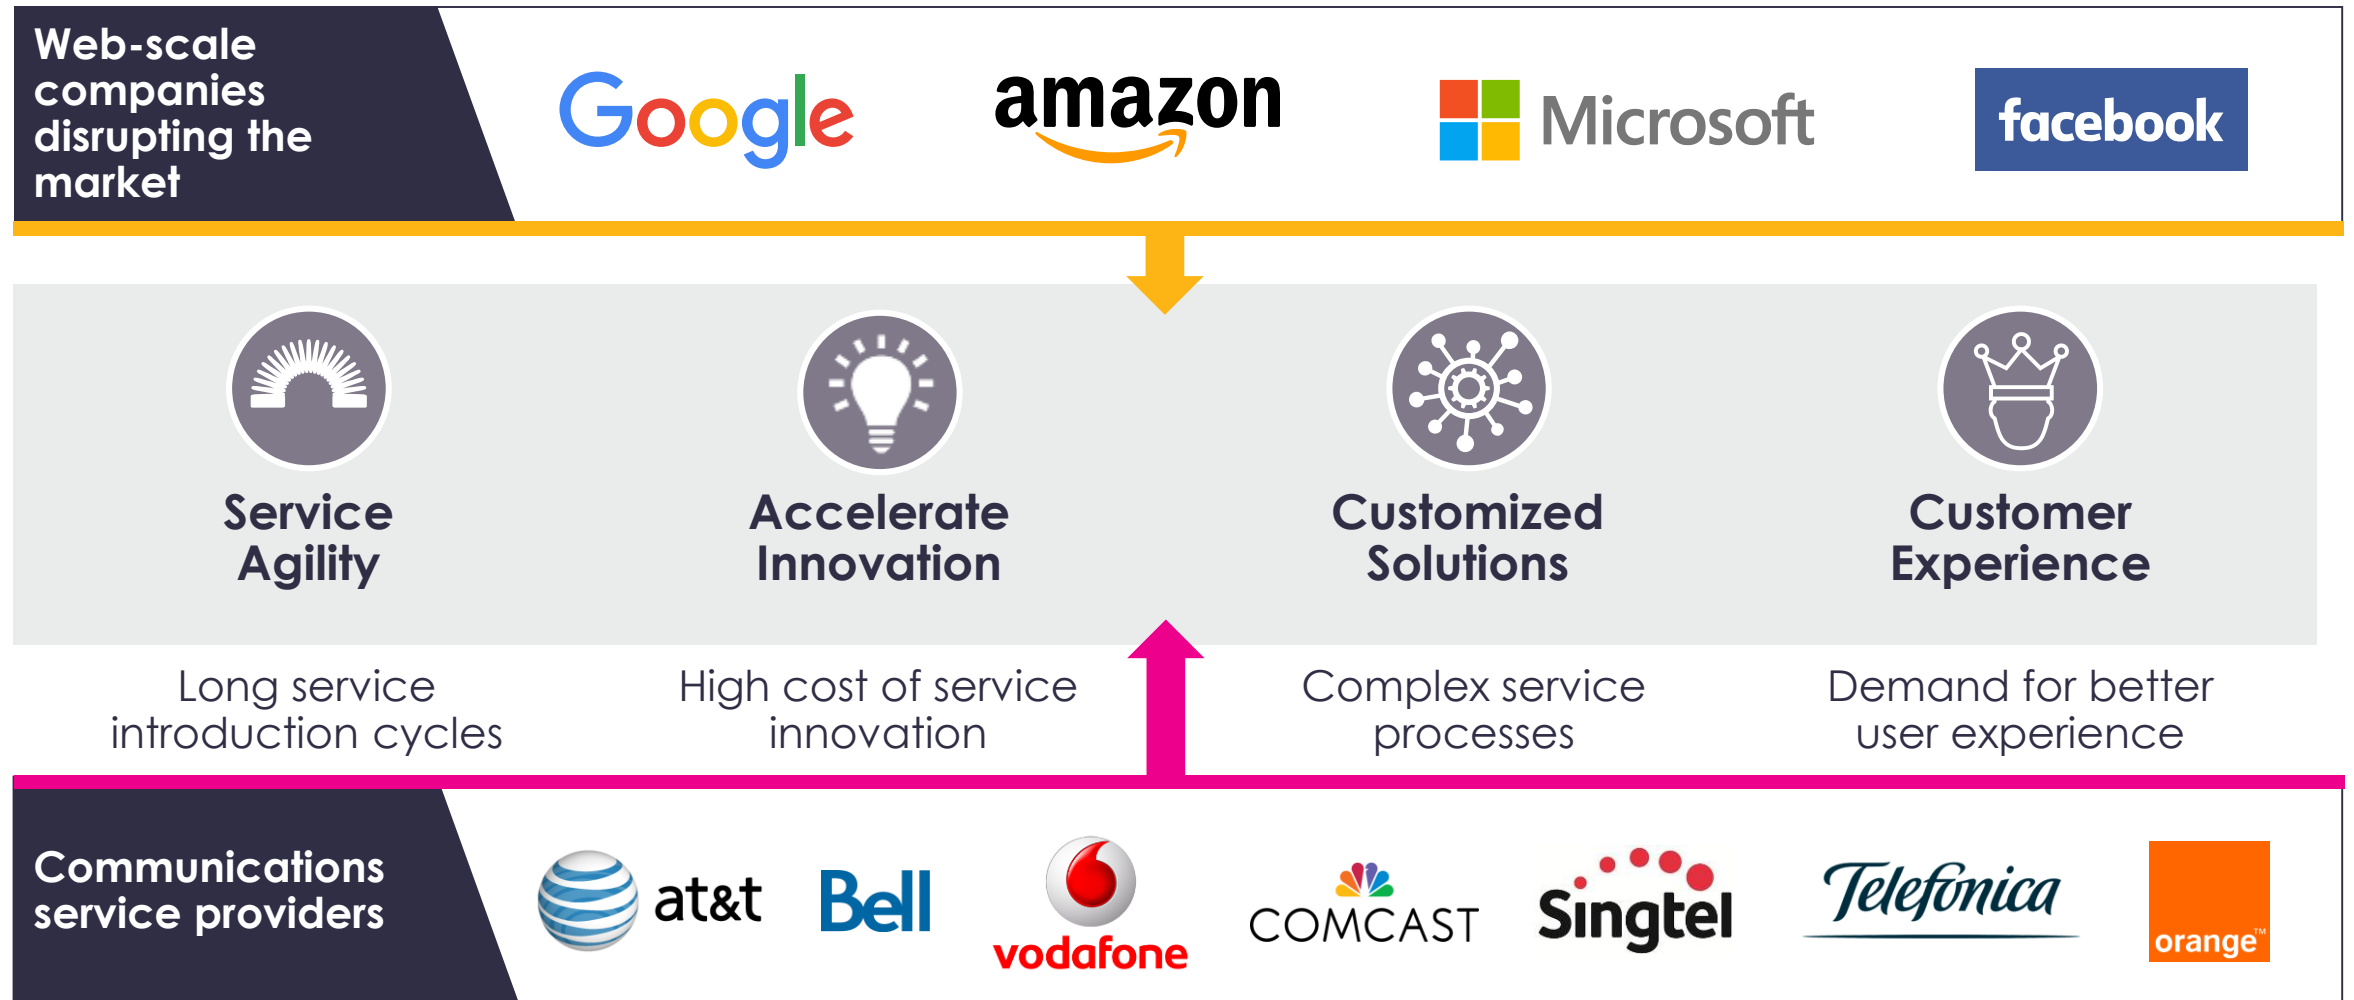

In addition, this presentation and our remarks include certain non-GAAP financial measures, including diluted earnings per share, free cash flow, non-GAAP operating margin, non-GAAP net income and non-GAAP diluted earnings per share growth. These non-GAAP financial measures are not in accordance with, or an alternative for, generally accepted accounting principles and may be different from non-GAAP financial measures used by other companies. In addition, these non-GAAP financial measures are not based on any comprehensive set of accounting rules or principles. We believe that the presentation of these non-GAAP financial measures, when shown in conjunction with the corresponding GAAP measures, provides useful information to investors and management regarding financial and business trends relating to its financial condition and results of operations, as well as the net amount of cash generated by its business operations after taking into account capital spending required to maintain or expand the business. Additionally, we believe that non-GAAP financial measures have limitations in that they do not reflect all of the amounts associated with Amdocs' results of operations as determined in accordance with GAAP and that these measures should only be used to evaluate our results of operations in conjunction with the corresponding GAAP measures.

Please refer to the explanation of these non-GAAP financial measures under the heading “Non-GAAP Financial Measures” in Exhibit 99.1 to our Form 6-K filed with the U.S. Securities and Exchange Commission on November 9, 2016, and to the Reconciliation of Selected Financial Metrics from GAAP to Non-GAAP tables included therein.

This presentation will be available on our website at <http://investors.amdocs.com/phoenix.zhtml?c=113915&p=irol-IRHome>

What is driving NFV?

Market dynamics - Open source

Faster innovation

“...for integrators and service providers that adopt in this platform and are part of this ecosystem, they’ll see new and innovative services delivered much more quickly.”

 **Chris Rice**
SVP AT&T Labs, Domain 2.0
Design & Architecture

Standardization

“...we need a way, a common way, to bring different vendor solutions on the same infrastructure, and open-source is a way to address this very complex issue.”

 **Laurent Leboucher**
Vice President APIs
and Digital Ecosystems

Reduce costs – vendor-lockin

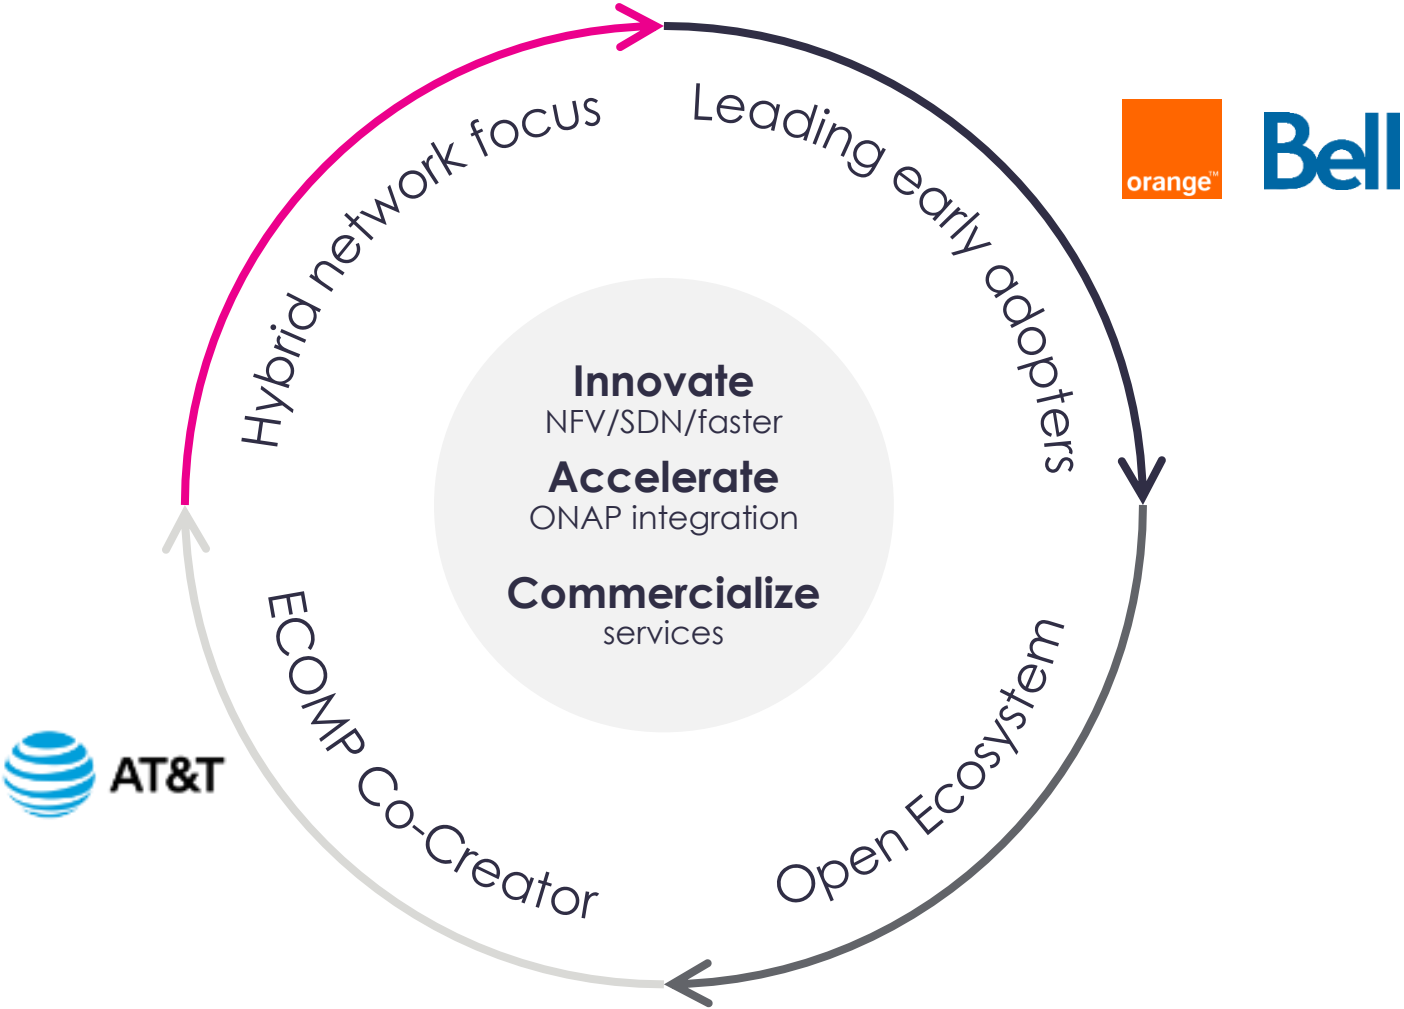

“...it forces vendors to open and standardize their interfaces and protocols, which helps us as an industry to become more agile and drive our costs down... In general service providers are no longer locked in to any vendor.”

 **Petri Lyytikainen**
VP Technology Strategy & Planning

Amdocs value in ONAP

NFV Powered by Open Network Automation Platform (ONAP)

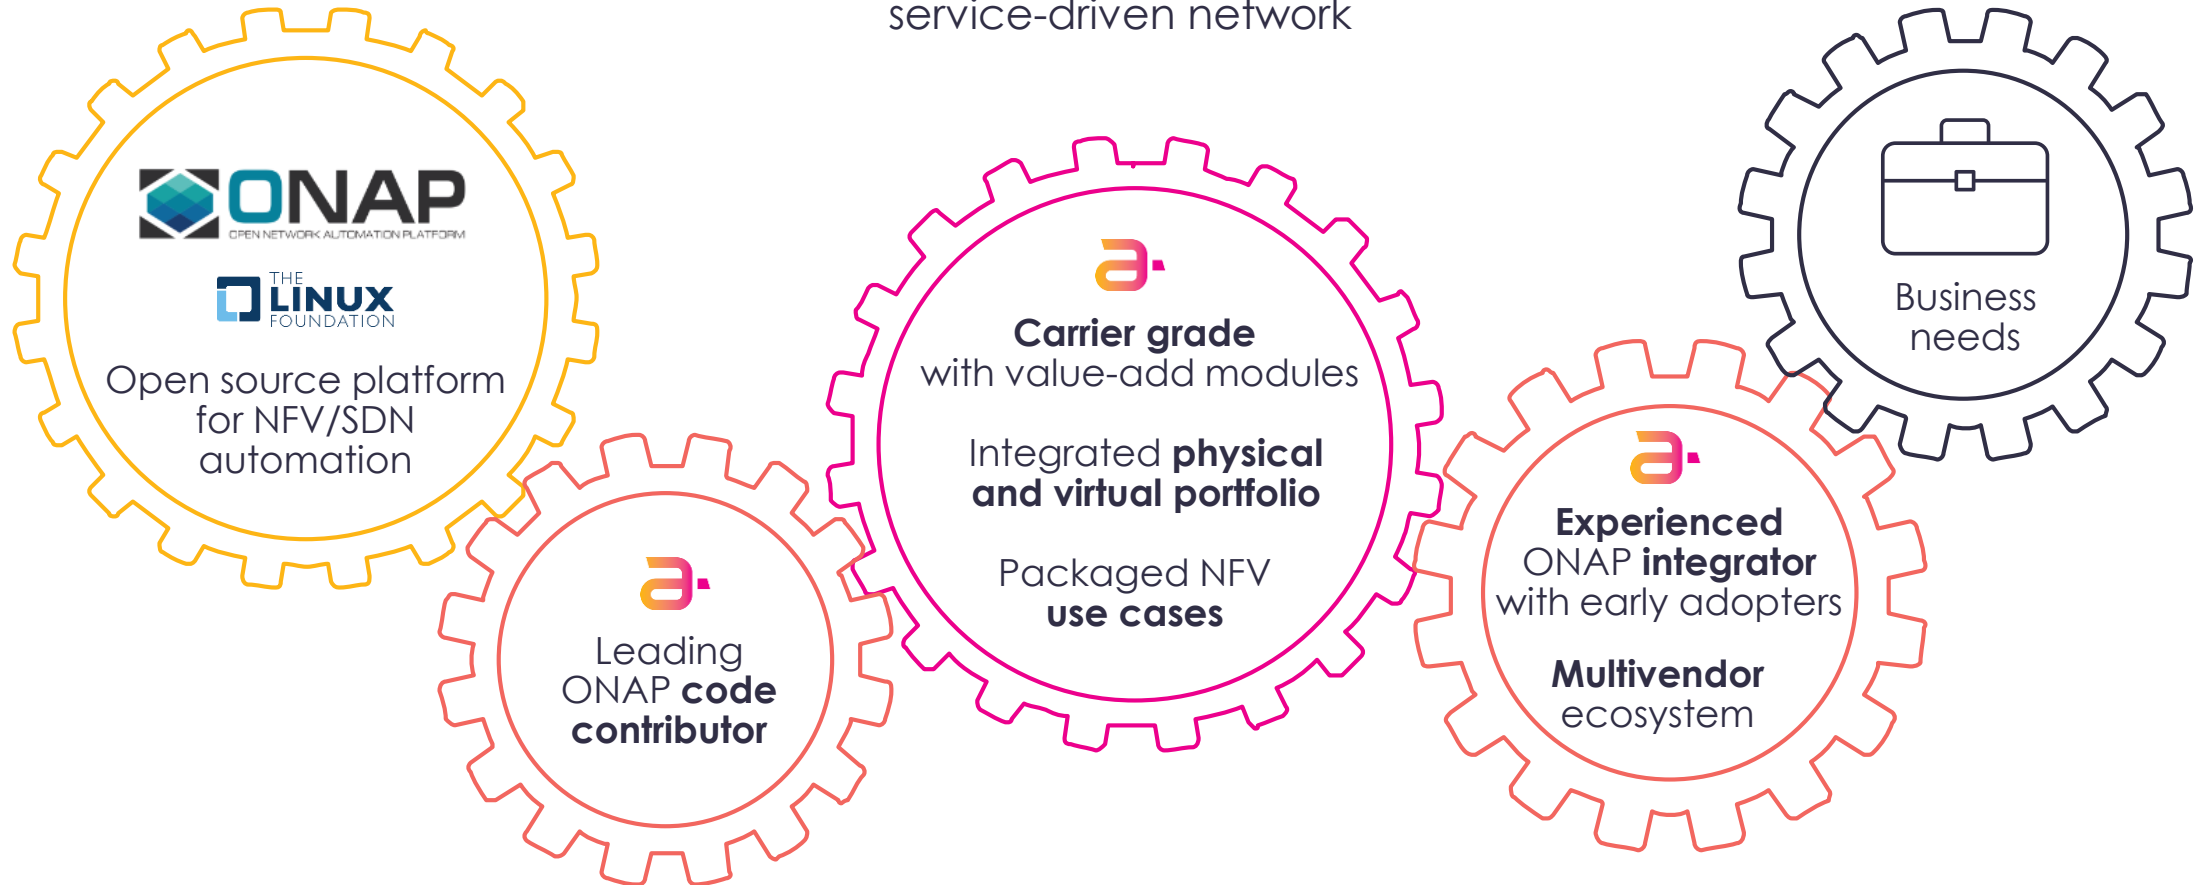

Amdocs NFV Powered by ONAP

First to enable service providers to leverage ONAP open source platform to meet business needs

NFV/SDN platform

Service providers

Amdocs Services for NFV Portfolio

Planning

Services to help CSPs design and plan for their NFV/SDN automation/orchestration platforms

Implementation

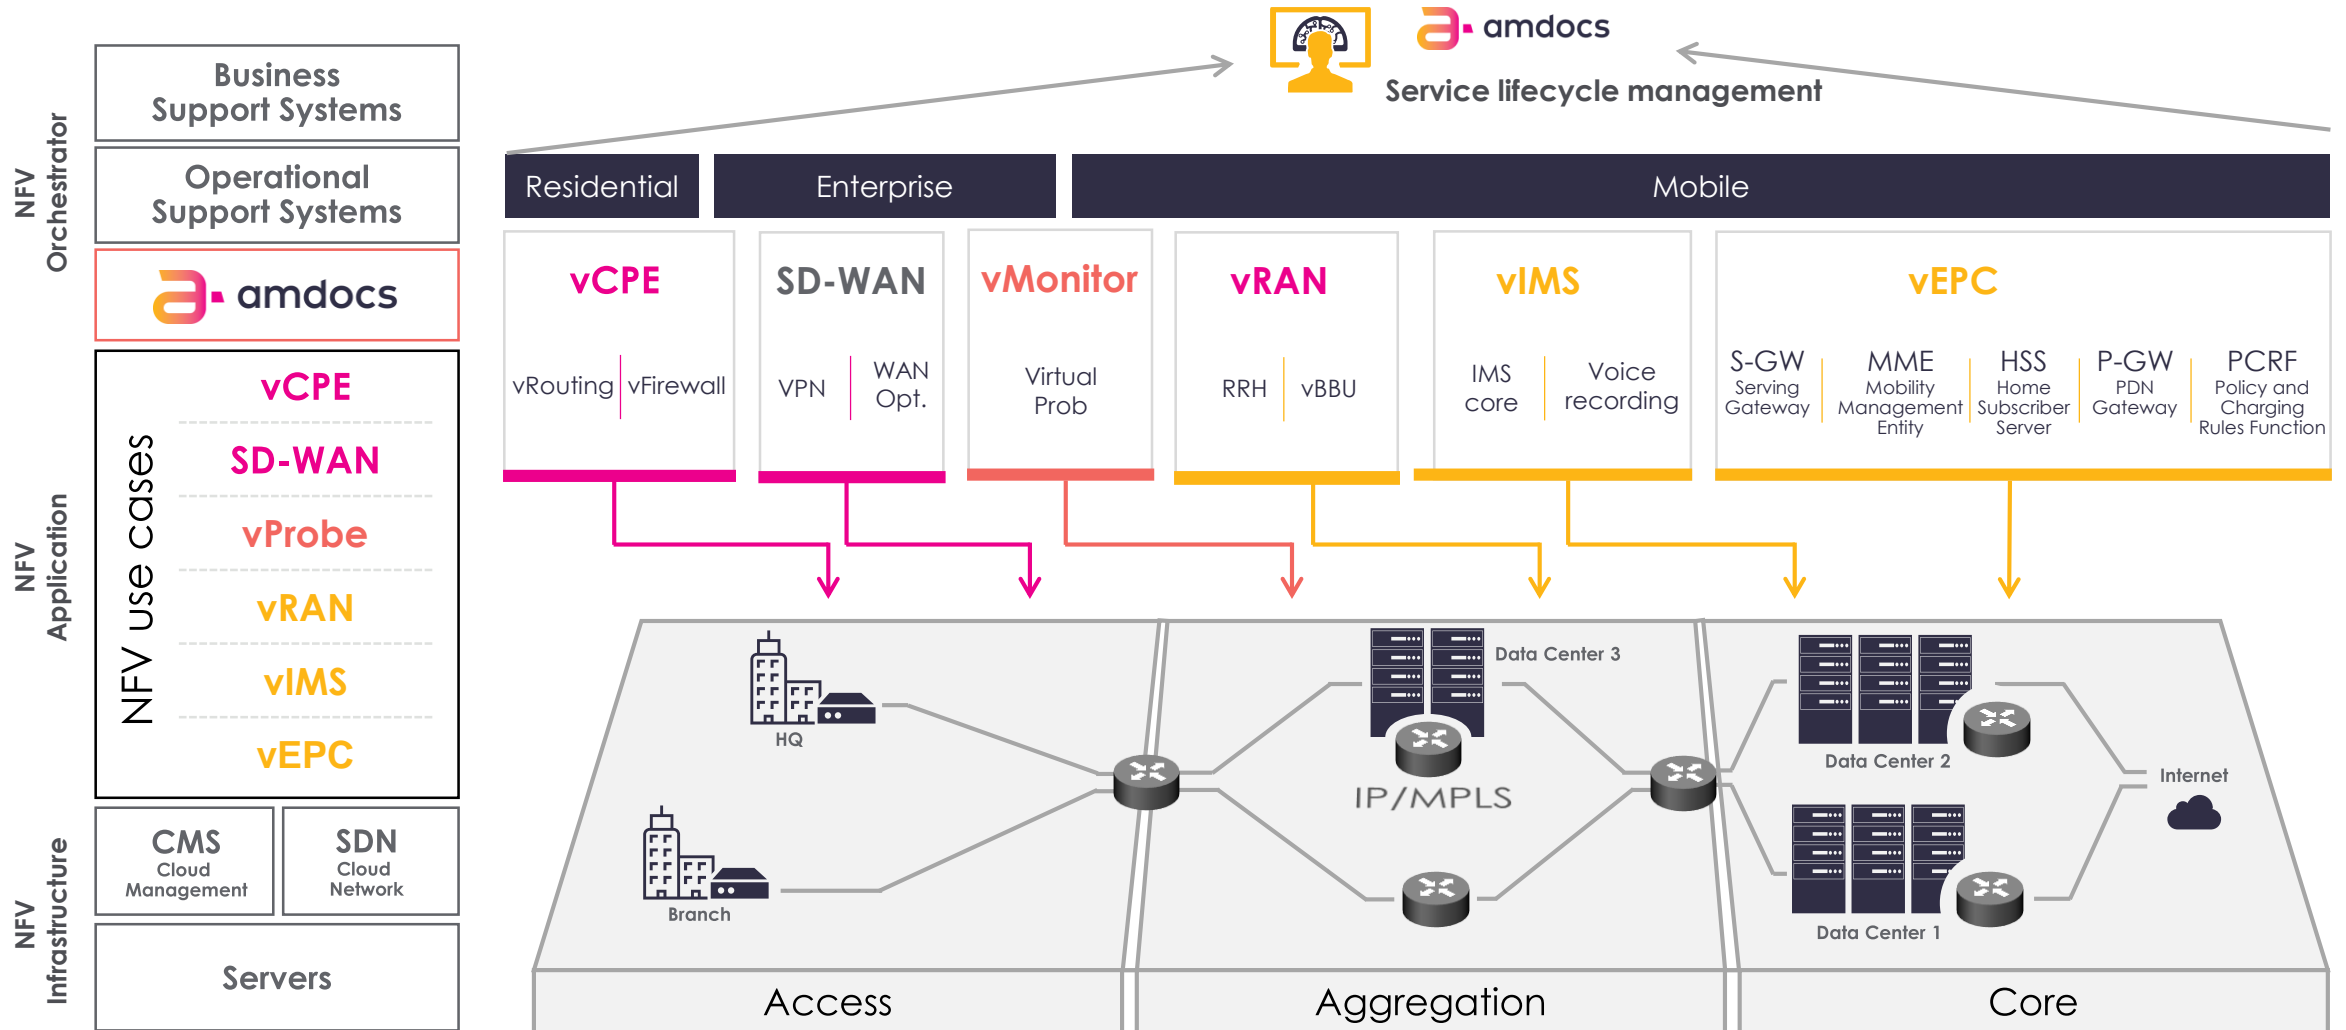

Services to help CSPs deploy and configure the platform, and integrate it into their hybrid networks

Operation

Services to help CSPs with the ongoing operation, monitoring, assurance and optimization of the platform

Enabling NFV/SDN multi-vendor innovation

Amdocs NFV partner ecosystem

80+ virtual network functions from leading industry vendors

NFV
Orchestration

NFV
Applications (VNF)

NFV
Infrastructure

NFV service lifecycle management

Amdocs NFV – powered by ONAP

Accelerates adoption of NFV

Business challenges

Realizing the value of NFV/SDN – quickly

Accelerating introduction of innovative virtual services

Achieving efficient operations across physical and virtual networks and services

How to benefit from open source for automation of network operations

Amdocs' solution

New blueprint

Carrier grade with value-add modules for a complete portfolio of hybrid (physical/virtual) network and services

Cloud-based hosting environment

ONAP one-click deployment simplifies distribution

Packaged NFV use cases accelerate introduction of new virtual services

Open, multivendor ecosystem with >80 VNFs to avoid vendor lock-in

Complementary expert services for NFV planning, implementation, and operations

Benefits

Fast, low-risk
ONAP deployment

Rapid TTM for new
virtual services

Unique expertise
and experience

Efficient hybrid operations
(physical and virtual)

Openness and
vendor neutrality

“Amdocs brings unique expertise derived from working with ONAP's early adopters”

Thank you
